## **DETAILED ACTION**

### ***Allowable Subject Matter***

**Claims 28-56 are allowed in view of the prior art.**

The following is an examiner's statement of reasons for allowance:

As to claims 28 and 50, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a process and apparatus for recording the deformation of an object, in combination with the rest of the limitations of the above claims.

With further regard to the claims, the applicants' arguments and declaration in response to the previous Office Action lay out detailed reasons for the allowability of the claims. In particular, the prior art fails to disclose a system and corresponding method where phase images are determined from a recorded sequence images of an object experiencing deformation, with a differential being formed between a pair of sequential images and then having this differential added to a first image, with these deformation images integrated to provide the total deformation of the object, in combination with the rest of the elements, method steps, and limitations of the corresponding claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Lyons whose telephone number is 571-272-2420. The examiner can normally be reached on Monday through Friday.
